### GENERAL INFORMATION

AMMONIUM SULFATE is a fast-acting source of nitrogen. Use it all around the lawn and garden. It is ideal for greening up a lawn or growing lush flowers and vegetables.

### DIRECTIONS FOR USE

**LAWNS:** Use a push-type or handheld spreader to scatter the granules uniformly. Apply 5 pounds per 1,000 sq. ft. of lawn. Then turn on the sprinklers and water it in.

**FLOWER BEDS & VEGETABLE GARDENS:** Before planting, scatter 1-2 pounds per 100 sq. ft. Then work the fertilizer in by tilling the soil.

**SHRUBS & TREES:** AMMONIUM SULFATE is perfect for acid-loving plants like azaleas, conifers, and rhododendrons. Scatter a handful over the root zone and water it in. (The root zone is the circular area from the trunk out to the ends of the branches.)

**COMPOST PILES:** AMMONIUM SULFATE adds nitrogen to compost and speeds decomposition. Scatter 1-2 pounds per 10 sq. ft. of packed organic material. Apply more fertilizer after each 6-inch deep layer is added to the pile.
